## To Whom It May Concern

Dear Sir / Madam,

**Re: PACIFIC DATA SOLUTION - NEW DATA CENTER PROJECT  
KRAMER AUSENCO (VANUATU) LTD - PROFESSIONAL SERVICES**

This is to certify that Kramer Ausenco (Vanuatu) Ltd (formerly Kramer Group) has successfully delivered our **Pacific Data Solution (PDS) - New Data Centre Project**, which was completed in July 2007.

The PDS Port Vila Data Centre Complex comprised of a Data Center Building, Administration Office Block, Generator Building, 2No x 11.0m diameter Satellite dishes (one is elevated 10.0 above ground level) designed to a post-disaster standard facility. The buildings are fully air conditioned and were designed to allow for a future expansion by adding another storey.

Kramer Ausenco (Vanuatu) Ltd under the leadership of Danny Amanaki (Manager - Kramer Vanuatu) provided professional services for the Project including: design documentation (conforming to international standards), tender management and contract administration. Kramer Ausenco's consultancy roles covered Project Management, Architectural, Geotechnical Engineers, Structural / Civil Engineers, Electrical and Buildings' Air Conditioning.

I (PDS) have found Kramer Vanuatu staff delivered the services for the PDS Data Centre Project with pride and very professionally and as such I have no hesitation in recommending Kramer Ausenco (Vanuatu) to any potential Clients and should you require further details, please do not hesitate to contact the undersigned.

Yours Sincerely,

  
**Simon Fletcher**  
Managing Director
