

Factsheet

Toyota Waigani

Commercial, Residential and Industrial

Project Title

Toyota Waigani Complex

Location

Waigani, Port Moresby, PNG

Client

Toyota Tsusho South Pacific

Project Type

Commercial

Year Completed

2009

Project Description

The Client planned on this project to upgrade the existing office area to expand the internal office spaces and install improved fascia signage as part of their staged development program.

Kramer Ausenco was commissioned to design and document the fascia fixing cleats and the lintels respectively, provide structural engineering certification, issue documentation and liaise with NDC Building Board for approvals and undertake site inspections during construction.

Project was completed on time and budget.

Project Role

- Civil Engineers
