

Factsheet

UN SIDS Media Centre

Public Sector & Urban Development

Project Title

UN SIDS Media Centre

Location

Uplou, Samoa

Client

Government of Samoa & Maota Builders

Project Type

Conference & Media Personnel Facility

Year Completed

2014

Project Description

The building was constructed in preparation of the 2014 UN Small Island Developing States Conference meeting being held in Samoa. It was designated as the main hub for media personnel for all incoming and outgoing information during the conference.

The two storey building was divided into two separate spaces. The ground floor contained offices and audio-visual editing booths for the media personnel. The first floor held three conference facilities to cater for 400 people.

The building is located just out of the main Apia CBD in the Tuanaimato Sports complex.

Total Floor Area

2500 sqm

Project Role

- Structural Engineers
- Civil Engineers
